## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3-10 and 13-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over one of Kubo (US 6,297,616) in view of Zhang (US 6,291,972) and Kutkut (US 6,664,762) in view of Zhang (US 6,291,972). Both references '616 and '762 disclose a battery charger having, *inter alia*, a plurality of batteries being charged through a high frequency transformer. A controller regulates power delivered to each of the battery module. Each battery module has its own rectifier and inverter. However it does not disclose each battery module is considered as a "slave module." The reference of Zhang discloses a plurality of power modules used as "slave modules" to control the charging of the cells. Each slave is responsible for the charging characteristics of its load. It would have been obvious to one having ordinary skill in the art to have established a master-slave relationship among the plurality of modules for the purpose of unloading the processing time of the master module. Hence it increases efficiency.

***Allowable Subject Matter***

Claims 1, 18-21 and 24-28 are allowed.

***Response to Arguments***

Applicant's arguments with respect to claims have been considered but are moot in view of the new ground of rejection.
